3 PHASE TRAINING

Grid Reliability & System Operations

See how utility teams plan, operate, and restore a reliable electric grid.

What is the course?

Follow the decisions operators make from day-ahead planning through real-time conditions and emergencies. Connect balancing, voltage, reserves, limits, and protection to practical operating and restoration decisions.

Who should attend?

Utility operations and planning staff, engineers, control-center support teams, reliability analysts, project managers, and professionals who coordinate with system operators.

Eight hours of instructor-led training.

Why Choose Us?

Cost
Your organization pays one course fee with unlimited attendees at no extra cost.

Quality and Experience
Real projects and interactive discussion connect concepts to practical decisions.

Customization
Each course content is individually customized to your team and organization

Content examples

Power balance and limits

- Reliability roles and concepts
- Frequency and reserves
- Voltage and network limits
- Operating constraints

Planning and real-time ops

- Day-ahead preparation
- Operating studies
- Situational awareness
- Protection and disturbances

Response and improvement

- Emergency coordination
- Distribution restoration
- Performance review
- Operational improvements
