3 PHASE TRAINING

Wildfire Mitigation for Electric Utilities

Understand how electric utilities assess wildfire risk and choose measures to reduce it.

What is the course?

Connect risk mapping, vegetation management, equipment inspection, and hardening to day-to-day utility decisions. Discuss weather awareness, de-energization, customer protection, emergency coordination, and restoring service.

Who should attend?

Utility wildfire program managers, engineers, operations leaders, vegetation managers, asset planners, emergency managers, regulatory staff, and customer communications teams.

Eight hours of instructor-led training.

Why Choose Us?

Cost

Your organization pays one course fee with unlimited attendees at no extra cost.

Quality and Experience

Real projects and interactive discussion connect concepts to practical decisions.

Customization

Each course content is individually customized to your team and organization

Content examples

Risk and prevention

- Utility wildfire exposure
- Data, maps, and models
- Vegetation management
- Inspection programs

Equipment and operations

- Equipment hardening
- Design choices
- Situational awareness
- De-energization decisions

Customers and recovery

- Customer protection
- Emergency coordination
- Service restoration
- Mitigation plans and performance
